

HARMO-DATA INTERREG Project «Data harmonization for cross-border territorial management»

Interreg
ITALIA-SLOVENIJA

 **GEODETSKI INŠTITUT SLOVENIJE**

 insiel

terre srl

The overall objective of the project is to strengthen the cross-border institutional cooperation capacity by encouraging public institutions and key spatial planning stakeholders to develop common solutions for a coordinated and effective management of the cross-border area.

The goal of the project is to achieve an integrated platform for the cross-border spatial data harmonization and a management protocol implementation, which will be signed by representatives of competent public institutions in the project area.
