## Contest Rules

1. Students must optimize a design of their choice showing a marked improvement in weight while maintaining structural integrity (other alternatives - efficiency, sustainability, or some other optimized feature).
2. Students must use Inspire or another software found in Altair's suite of tools.
3. Students may enter as an individual or part of a team. There is no limit to team size, but the prizes awarded are per submission not per person.
4. Students may enter each monthly contest once, but each submission must be unique.
5. Students/Team(s) must agree for Altair to use their models and videos in promotional materials.
6. All judging is at the discretion of Altair and all decisions made by Altair are final.
7. Review the [Terms & Conditions](#) before you submit.
